

AAMIR ALI

Senior Full-Stack & AI Engineer | Laravel • Node.js • AI Agents & MCP

Lahore, Pakistan (Remote / US Hours) • +92 303 8951521 • aamirallidev@gmail.com • linkedin.com/in/aamir-ali-baloch • aamirali.pro

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 8+ years architecting Laravel/PHP and Node.js platforms for US companies in real estate, healthcare, and SaaS. Now building production AI — AI agents, an MCP-based support chatbot, tool calling, and LLM integration. Led engineering teams of 10–20+ from architecture and code review through delivery, introduced Dockerized CI/CD that cut deployment time by ~60%, and run AWS-hosted, multi-tenant production systems.

CORE EXPERTISE

AI Engineering: MCP servers & clients, AI agents, tool calling, LLM integration, RAG

Languages: PHP, JavaScript, TypeScript

Backend & Frameworks: Laravel, Node.js, Express.js, NestJS, MVC, OOP, Microservices

Frontend: React.js, Vue.js, Next.js, Nuxt.js, HTML5, CSS3

Databases: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, ECS, EFS), Docker, GitHub Actions, Jenkins, Terraform, CI/CD

APIs & Architecture: REST API Design, System Design, High-Concurrency Workflows, Authentication/Authorization

Testing & Tools: PHPUnit, Automated Testing, Git, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Project Lead Developer — SL Tech

Remote (US) | Aug 2025 – Present

- Built production AI agents and an MCP-based support chatbot that handle ~90% of support tickets automatically.
- Lead a team of 10 senior engineers across architecture, code review and delivery.
- Lead end-to-end development of real estate business platforms (Single Listing Websites) using Laravel, PHP, MySQL, and REST APIs — owning architecture through production deployment.
- Architect scalable backend systems for multi-tenant listing products, built for performance and maintainability.
- Design secure, API-driven workflows that automate sales, marketing, and operational processes for real estate clients.
- Serve as primary technical contact for stakeholders, turning business requirements into production-ready backend solutions.

Lead Software Engineer — Comlink Total Solutions

Remote (US) | Jan 2023 – Aug 2025

- Promoted from Software Engineer to Senior to Lead; oversaw IT operations and a 15+ person development team.
- Led architecture and development of a multi-tenant SaaS CRM for the US federal Affordable Connectivity Program (ACP) using PHP, Laravel, MySQL, and RESTful APIs — tested on 50,000+ customers and used by ~10 provider companies.
- Architected backend systems on MVC, OOP, and microservices principles, improving maintainability and deployment stability.
- Built API-driven workflows for customer management, reporting, and automation handling high-concurrency traffic.
- Introduced Dockerized CI/CD (GitHub Actions, Jenkins), cutting deployment time ~60% and reducing production incidents.
- Led and mentored a distributed dev team, driving code reviews, architecture planning, and performance optimization.
- Partnered with product managers in Agile/Scrum to translate business requirements into scalable technical solutions.

Technical Team Lead — ArhamSoft (Pvt) Ltd

Mar 2022 – Jan 2023

- Led architecture and development of enterprise websites and CRM platforms using Laravel, PHP, and MySQL.
- Owned architecture and delivery of Tour27.com end-to-end.
- Designed high-availability backend systems using MVC, OOP, and microservices patterns.
- Built and integrated RESTful APIs powering customer management, reporting, and automation workflows.
- Implemented Docker-based CI/CD pipelines, reducing deployment failures and accelerating release cycles.
- Mentored distributed engineering teams of 10–20, raising code quality standards and improving delivery predictability.

Senior Software Engineer — ArhamSoft (Pvt) Ltd

Jan 2020 – Mar 2022

- Developed scalable backend applications using Laravel, PHP, MySQL, and API-driven architectures.
- Built secure, token-based authentication and authorization systems for production applications.
- Optimized database queries and backend performance, improving response times and system reliability.
- Contributed to frontend integrations using Vue.js and React.js, connecting backend APIs to client-facing features.

Software Engineer — ArhamSoft (Pvt) Ltd

Dec 2018 – Jan 2020

- Implemented backend features using PHP, Laravel, and MVC architecture for client production systems.
- Developed and consumed REST APIs supporting internal tools and external integrations.
- Collaborated with cross-functional teams to ship production-ready applications on schedule.

Junior Software Engineer — CybexTech

May 2018 – Dec 2018

- Built backend features in PHP and Laravel under senior engineer guidance, gaining full-lifecycle development experience.
- Developed and consumed REST APIs for internal and external system integrations.
- Worked closely with cross-functional teams to deliver production-ready applications.

FEATURED PROJECTS

REConnect — Real estate MLS data integration platform for Canva (by Neutrino)

reconnectapp.com

- Engineered a RESO Web API-compliant MLS integration platform that syncs live listing data, property photos, and agent details from MLS boards directly into Canva, so agents and brokerages can build on-brand marketing materials from real-time listings.
- Built backend ingestion and normalization pipelines that map RESO-standard listing feeds into a unified data model, keeping property details, media, and open-house information accurate across connected accounts.
- Implemented secure OAuth-based authentication, API layers, and automated sync workflows bridging MLS data with Canva, designed for multi-MLS, multi-brokerage scale (listing search, filtering, and media delivery).

Tour27 — Travel and tour discovery platform

tour27.com

- Architected a scalable NestJS (Node.js) backend: modular services, REST APIs, authentication flows, and database schema.
- Built a high-performance, SEO-optimized Next.js frontend using SSR and static generation for faster loads and search visibility.
- Designed tour listings, itineraries, lead capture, and admin CMS; integrated maps, forms, analytics, and email notifications.

TheCareMD — Healthcare management platform

www.thecaremd.com

- US telemedicine platform serving 80k+ patients with live iOS and Android apps.
- Developed PHP/Laravel backend services and REST APIs for secure patient engagement and provider coordination workflows.

darzi.online (Founder) — Management software for tailoring businesses in Pakistan (MERN / Next.js)

darzi.online

- Founded, designed and built solo; used by 500+ businesses to manage orders, customer measurements and ledgers.

eSignPanda — Electronic signature platform

www.esignpanda.com

- Built backend automation and secure, API-based document processing for legally compliant e-signatures (UETA, eIDAS).

Kindertales — Cloud-based childcare management system

www.kindertales.com

- Contributed to a Laravel/MySQL childcare management system, automating administrative processes for childcare providers.

StylingCV — ATS-friendly resume builder platform

stylingcv.com

- Developed API-driven backend services for an ATS-friendly resume builder supporting 39+ customizable templates.

EDUCATION

Master of Computer Science (MCS) — Gomal University, D.I. Khan, Pakistan | 2013 – 2017 | Grade: A

CERTIFICATIONS

- Micro1 Certified Engineer — Nov 2024
- AWS Certified Solutions Architect – Associate
- Cisco Certified Network Associate (CCNA Cyber Ops) — Apr 2017
- Certified Laravel Developer
